Humanizing Technology for U.S. Diplomacy

Project Title	Humanizing Technology for U.S. Diplomacy
Project Summary	Use your graphic design and data visualization skills to make a difference in the daily work of U.S. diplomats! Help our office communicate effectively to U.S. diplomats about innovative uses of technology in advancing U.S. diplomacy.
Country	United States
Country/Region of Focus	Global

Project Description

As an intern, you would have the opportunity to help put a human face on the technological tools available in the Department and help us communicate our story about how to leverage the cloud, mobile and other resources to advance U.S. foreign policy goals. If you have graphic design and data visualization skills and are interested in the intersection between technology and diplomacy, this would be a great fit for you! Your skills can help ensure that information for U.S. diplomats about technological innovation is attractive and relevant.

Required Skills or Interests

Skill(s)

Data visualization

Design thinking

Graphic design

Infographic design

Additional Information

The Office of eDiplomacy serves as an applied technology think tank for the U.S. Department of State. We advocate for customers' needs in IT investments, policies, and services; support U.S. diplomats across the globe with collaborative technologies; and promote diplomatic and technological innovations to both foreign affairs

colleagues and civil society partners. To this end, we produce several products for diplomatic practitioners, including an internal blog, to help explain the technological tools that can be used to advance U.S. diplomacy.
